3T

1961: Mario Dedioniggi starts Tecnologia del Tubo Torinese. **1970:** Introduces the world's lightest saddle called the Superleggera. **1975:** Starts experimenting with 7075 Ergal alloy for handlebars. **1975:** Produces the world's lightest handlebar at 250g called the Superleggera. **1978:** Invents the Record 78 stem. **1980:** Gives consumers a range of different handlebar bends and names the models after the star riders of the time; Merckx, Gimondi, Saronni, Defilippis. **1982:** Invents the first fully opening stem called the 2000. **1983:** Introduces the world's first aerodynamic racing handlebar, the mother of modern aero handlebars, called the Aerodinamica. **1985:** Designs and produces the bullhorn-shaped time trial bar called the 51'151" named after Francesco Moser's hour record. **1986:** Reinvents the handlebar and stem by creating the world's first integrated stem & bar combo in carbon called the CarbonAir. **1987:** Produce the world's first triathlon handlebar called DH Bar for Scott USA. **1987:** Invents the world's first stem with internal computer cable routing called ComputerReady. **1988:** Produces the world's first clip-on bar called U-Bar for Scott USA. **1989:** Becomes the first handlebar every product with traceability codes. **1989:** Invents the world's first manufacturer in the world to mark stem with hinged clamp called the Model 2002. **1989:** Invents the "Stretch System" to easily open the old-style stems on the Synthesis model. **1989:** Invents the world's first drilled bar for the internal routing of brake cables called the Paris-Roubaix.

1989: Reinvents the handlebar by creating the world's most copied anatomic grip ever; the Forma SL. **1991:** Invents the front groove on racing bars for Campagnolo's Ergopower levers on the Paris-Roubaix Ergopower bar. **1992:** Designs and produces the world's most adjustable TT handlebar called the BioQuattro. **1993:** Sets a new world record for the lightest aluminum handlebar called Prima 220. **1993:** Produces the world's lightest cross-country mountainbike handlebar at 130g. **1993:** Produces the world's first handlebar using Alu-Ti (Alutan), with the fully adjustable Bio Arms, produced with the forged stem for copied stem in history; the ForgeA, the first morphologically correct Morphe. **1999:** Wins an I.D. International racing stem where the jury exclaims beautiful". **1999:** Once again sets a handlebar with the Prima 199. **2000:** Breaks its own world record for lightest handlebar with the Zepp XL. **2002:** Designs and produces a multi-shaped ergonomic carbon racing handlebar called More. **2003:** Reinvents the Morphe and sets new standards in ergonomics with the Morpheus. **2003:** Reinvents women's cycling with the world's first female-specific handlebar called the Eva. **2004:** Takes ergonomics to the next level with the BioMorphe. **2007:** 3T relaunches with a completely new set of components, all in 3 easy-to-understand color-coordinated levels: PRO, TEAM & LTD. **2008:** Reinvents the classic Merckx bend from the 80's into a superlight carbon bar called the Rotundo. **2008:** The 3T Funda fork sets new standards in aerodynamics and becomes the fork of choice for

many bike companies including Cervélo. **2008:** Reinvents the BioMorphe with a lighter shape called the Ergosum. **2008:** Combines the ergonomics of the BioMorphe and low weight of the Ergosum to create a new standard of comfort called the Ergonova. **2008:** Reinvents aerobars again with the thinnest & most aero integrated aerobar with integrated brake levers; the Ventus. **2010:** Creates the first full aero omnium track bar with additional aero hand positions called the Sphinx. **2009:** Creates an aero dropbar with integrated clip-ons for ITU triathlon racing called the Zefiro. **2010:** Reinvents track cycling with the stiffest & most aero sprint bar called the Scatto, which becomes the bar of choice at the 2012 Olympics. **2010:** Reinvents the seatpost with micro-step Diffloc system on the Palladio. **2011:** Reinvents the minimalist aerobar with the narrowest & most aero base bar called the Brezza Nano. **2011:** Reinvents the adjustable stem with the zero-slip micro-step Diffloc system on the ARXA. **2011:** Invents the spoke pocket, a designed-for-carbon solution to attach spokes to the rim without the need to drill holes. **2012:** Creates a mash up of the classic Merckx bend and an ergonomic top portion called the Tornova. **2012:** Creates the first super-aerobar fully integrated with a frame; the Aduro designed for the Cervélo P5. **2012:** Creates the world's first stem with integrated computer mount together with Garmin called the Integra. **2012:** Sets new standards for drop bar aerodynamics by introducing the Aeronova. **2014:** Introduces custom color options hand-painted in Italy for its cockpit parts. **2015:** Becomes the first bike wheel manufacturer to offer a full wheel range for road disc brakes called the Discus series. **2016:** Reinvents gravel riding by with the world's first aero gravel bike called the Exploro. **2016:** Becomes the first wheel manufacturer to offer 650b wheels specifically for RoadPlus and GravelPlus tire set-ups; the Discus Plus series. **2016:** Reinvents the aerobar once again with a reverse grip for increased safety and control called the Revo. **2017:** Reinvents the seatpost again with a 0 & 25 mm offset integrated into one post called the Zero25. **2017:** Reinvents aero road bike design by increasing comfort and reducing drag, dedicating the design completely to wider tires and a 1x drivetrain; the Strada. **2018:** First 1x aero crank; the Torno. **2018:** Brings Strada speed & comfort to fans of 2x drivetrains with the Strada Due. **2020:** First supplier to BMW of a Lifestyle Gravel Bike. **2020:** All new 3T Exploro RaceMax series. **2021:** First e-bike. **2022:** Exploro Ultra. Unstoppable gravel.
